

VIJAY ASHLEY RODRIGUES

Senior Data Engineer

📞 +919353579475 @ rodriguestvjay92@gmail.com 🔗 <https://www.linkedin.com/in/vijayrodrigues>

🌐 <https://www.vijayrodrigues.com> 📍 Bangalore, Karnataka

SKILLS

Programming & Query Languages

Python, SQL, PySpark, Spark SQL

Data Engineering & Processing

Apache Spark, Delta Lake, dbt, ETL/ELT, Data Pipelines, Data Transformation, Data Integration

Cloud & Data Platforms

Azure Databricks, Azure Data Lake Storage (ADLS), Azure Synapse Analytics, Azure Data Factory (ADF), Snowflake, Unity Catalog, Hive Metastore

Data Modeling, Governance & Quality

Data Modeling, Dimensional Modeling, Data Quality, Data Migration, dbt Testing, Data Validation & Reconciliation Frameworks, Data Governance, Access Control

Orchestration, DevOps & Collaboration

Databricks Jobs & Workflows, Apache Airflow, Git, GitHub, JIRA, Agile/Scrum

Performance Optimization

Spark Performance Tuning, SQL Optimization, Medallion Architecture

AI, LLM & Analytics

Snowflake Cortex Analyst, LLM Analytics, Prompt Engineering, Natural Language-to-SQL, Semantic Modeling, AI-Assisted Development (Claude Code),

BI & Analytics Platforms

Qlik Sense, Streamlit

CERTIFICATIONS

Databricks Certified Data Engineer Associate

SUMMARY

Senior Data Engineer with 6+ years of experience designing and modernizing scalable ETL/ELT pipelines using Azure Databricks, PySpark, SQL, Delta Lake, and dbt. Proven experience in data platform modernization, performance optimization, data governance, and large-scale data processing, including Unity Catalog migrations, reconciliation frameworks validating 240M+ records, and multi-region analytics platforms. Databricks Certified Data Engineer Associate with hands-on experience enabling LLM-powered analytics through Snowflake Cortex Analyst and semantic model development.

EXPERIENCE

Senior Data Engineer - II

Chubb

📅 12/2021 - Present 📍 Bangalore, India

- Established a dbt framework for Business360 by migrating **45+ notebook-based transformations** into **65+ dbt models**, improving maintainability and efficiency for analytics workflows supporting **10+ users**.
- Architected and modernized multi-region **ETL pipelines** for the API Monitoring Dashboard platform across APAC, EU, and NA, reducing end-to-end execution time from **10 to 12 hours to ~4 hours** through PySpark workflow optimization and automation.
- Led Business360's migration to Unity Catalog, transitioning **300+ tables** from Hive Metastore and establishing centralized governance, fine-grained access controls, and lineage visibility across shared data assets.
- Established a reusable PySpark reconciliation framework to validate over **240+ million records** across more than **7 external data providers**, reducing manual QA effort and ensuring migration accuracy and consistency across downstream datasets.
- Led Databricks and Delta Lake performance optimization initiatives through Spark tuning and storage optimizations (OPTIMIZE, ZORDER, VACUUM, column pruning), reducing job runtime by **approximately 35% (from 7 hours to approximately 4.5 hours)** while lowering compute costs.
- Led Business360 semantic model development for **Snowflake Cortex Analyst**, creating **20+ verified queries**, business metadata, synonyms, and intent-driven query patterns to improve natural language query accuracy and self-service analytics.

Data Engineer

Proziod Analytics Pvt Ltd

📅 08/2020 - 12/2021 📍 Bangalore, India

- Automated recurring Python- and SQL-based data preparation workflows, **reducing manual effort by 40-50%** and improving consistency across recurring reporting cycles.
- Established standardized ingestion and validation pipelines for Excel and CSV data sources, **improving data accuracy by 30-35%** and reducing downstream data quality issues.
- Developed reusable transformation frameworks and data cleanup processes, **reducing maintenance effort by 20-25%** and improving long-term pipeline stability.

EXPERIENCE

Technical Recruiter
[TEKsystems \(2019–2020\) – Early career experience.](#)

- Early career role providing exposure to technical hiring processes and candidate evaluation.

EDUCATION

Post Graduate Program in Artificial Intelligence and Machine Learning (2024–2025)
[Texas McCombs School of Business](#)

Master of Business Administration - Marketing & HR (2016–2018)
[SDM College of Business Management](#)

Bachelor of Computer Applications (2013–2016)
[St. Aloysius College](#)
